Danske Invest Management A/S is authorised in Denmark and regulated by Finanstilsynet (the Financial Supervisory Authority in Denmark).
Publication date:	16.09.2026

What is the product?

Type

The product is a share class of a Danske Invest SICAV fund. Danske Invest SICAV is an umbrella structure under UCITS law with several funds.

The prospectus and the periodic reports are made for the whole Danske Invest SICAV but with information for each fund.

Your investments will not be affected by the development in any other Danske Invest SICAV fund, as the assets and liabilities of each fund are segregated by law.

Term

The fund has no defined maturity date. However, please note that the fund may be closed if it is in the interests of the shareholders and endorsed by the board in relation with specific conditions or circumstances as described in the prospectus.

Objectives

The objective of this fund is to achieve investment growth in any type of market condition (absolute return). The share class is accumulating.

The fund gains exposure to a range of asset classes, such as equities, bonds, money market instruments and currencies, from anywhere in the world, using a tactical investment strategy. The fund may gain exposure to any credit quality, sector and country, including emerging markets.

The fund is categorised as article 8 under SFDR and promotes environmental and/or social characteristics, as well as good governance practices, through screening, exclusions, investment analysis and decision-making as well as active ownership. The fund follows Danske Invest's responsible investment policy.

The fund may invest in, or be exposed to, the following investments up to the percentage of net assets indicated: debt instruments with a rating of Baa3/BBB- (or similar) or lower: 75%, including debt instruments with a rating of Caa1/CCC+ (or similar) or lower: 15%.

In actively managing the fund’s portfolio, the management team combines market analysis and macroeconomic forecasts when assessing risk and return in order to take advantage of market opportunities.

The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes.

Benchmark

The reference benchmark used for performance fee calculation is the Denmark Short Term Rate. The fund is managed without any constraint related to the benchmark

Further information

More detailed information about this fund is available in the fund prospectus or in the latest semi-annual and annual reports which are available in English free of charge at www.danskeinvest.com.

Price publication

The value or Net Asset Value for the product is calculated on each business day. The latest prices are available online at www.danskeinvest.com.

General trading terms

Orders to buy, switch and redeem shares are ordinarily processed on a daily basis. All trading conditions are available in the following section of the prospectus: "Subscribing, Switching, Redeeming and Transferring Shares".

Tax legislation

The fund is subject to the tax laws and regulations of Luxembourg. Depending on your own country of residence, this may have an impact on your investment or your personal tax position. For further details please consult a tax adviser.

Depositary

J.P. Morgan SE - Luxembourg Branch

Intended retail investor

Not intended for retail investors. For further information, please refer to the prospectus.

What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Be aware of currency risk. In some circumstances you may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level. This classification may change and may not reliably indicate the future risk profile of the fund. The lowest category does not mean risk free.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The fund may use derivatives to a significant degree and be exposed to certain events, e.g. changes in the regulatory/political situation. These risks may not be fully reflected in the risk indicator.

For further details about risk, please refer to the following section in the fund's prospectus: "Risk Descriptions".

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: **3 year(s)** **Example Investment:** **DKK 75,000**		**If you exit after 1 year(s)**	**If you exit after 3 year(s)**
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	DKK 56,721	DKK 62,980
	Average return each year	-24.4%	-5.6%
Unfavourable	What you might get back after costs	DKK 67,466	DKK 72,399
	Average return each year	-10.0%	-1.2%
Moderate	What you might get back after costs	DKK 77,666	DKK 80,139
	Average return each year	3.6%	2.2%
Favourable	What you might get back after costs	DKK 82,807	DKK 90,567
	Average return each year	10.4%	6.5%

Unfavourable scenario: This type of scenario occurred for an investment between 30.09.2019 and 30.09.2022.
Moderate scenario: This type of scenario occurred for an investment between 31.03.2019 and 31.03.2022.
Favourable scenario: This type of scenario occurred for an investment between 28.02.2023 and 28.02.2026.

Calculation method

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The table shows the money you could get back over the next 3 years, under different scenarios, assuming that you invest DKK 75,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

What happens if Danske Invest Management A/S is unable to pay out?

The fund assets are kept separate from the management company's own assets. They are safeguarded and controlled by the fund depositary bank and are kept separate from this bank's own assets. Therefore, neither an insolvency of the management company nor of the depositary bank will make you lose the money invested in the fund. The product is not protected by the Investor Compensation Scheme.

What are the costs?

The person advising on or selling you this product may charge you other cost. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:
- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- DKK 75,000 is invested.

	If you exit after 1 year(s)	If you exit after 2 year(s)	If you exit after 3 year(s)
Total costs	DKK 630	DKK 1,260	DKK 1,890
Annual cost impact (*)	0.84%	0.84% each year	0.84% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.1% before costs and 2.2% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

One-off costs upon entry or exit (DKK 75,000)		If you exit after 1 year
Entry cost	0.00% of the invested amount in subscription cost when subscribing to the fund. This is the most you will be charged. The distributor will inform you of the actual cost.	Up to DKK 0
Exit cost	0.00% of the redeemed amount in redemption cost. This is the most you will be charged. The distributor will inform you of the actual cost.	Up to DKK 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	Annual ongoing cost of the product is 0.51%. This is an estimate based on actual costs over the last calendar year.	DKK 383
Transaction costs	0.12% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	DKK 90
Incidental costs taken under specific conditions		
Performance fees	20% of the share-class outperformance compared to the reference indicator, which is the High-water mark adjusted by Denmark Short-Term Rate (DESTR). The average of the last 5 years performance fee was 0.21%.	DKK 158

How long should I hold it and can I take money out early?

Recommended holding period: 3 years.

The recommended holding period is determined by the principle risks of the fund as described in the section “What are the risk and what could I get in return”.

You may redeem your shares on a daily basis. All trading conditions are available in the following sections of the prospectus: "Subscribing, Switching, Redeeming and Transferring Shares". The redemption fees are not depending on your holding period. Please refer back to “What are the costs?” section.

How can I complain?

Customer complaints regarding the funds managed by Danske Invest Management A/S should be addressed to:

Danske Invest Management A/S,
Bernstorffsgade 40,
1577 København V,
