PRIP name:	Structured Note - Autocallable - SE0014782223
Name of PRIP manufacturer:	Danske Bank A/S - <a href="http://www.danskebank.se">www.danskebank.se</a>
Contact number for PRIP manufacturer:	Call 0752-48 00 00 for more information
Competent Authority:	Authorised by the Danish Financial Supervisory
Date of production:	The date of this Key Information Document is 4 December 2020

**Alert:** You are about to purchase a product that is not simple and may be difficult to understand.

## What is this product?

### Type

Equity-Linked Notes issued in uncertificated and dematerialised book-entry form cleared through Euroclear Sweden.

### Objectives

The objective of this product is to provide you with the benefit of a coupon that is subject to the performance of worst performing underlying asset being at or above the interest barrier on a given interest valuation date, while at the same time exposing you to the downside risk of a price decrease, if the worst performing underlying asset goes below a risk barrier at maturity, and the product has not been redeemed early. Early redemption (autocall) will take place, if the worst performing underlying asset is at or above the autocall barrier on any autocall valuation date.

If, on a given interest valuation date, the worst performing underlying asset is at or above the interest barrier, the product will pay a fixed coupon plus any previously unpaid coupon(s). Otherwise, the product will not pay anything for that particular interest period.

The product will automatically redeem early (autocall) at par, if on a given autocall valuation date, the worst performing underlying asset is at or above the autocall barrier.

If the product has not redeemed early, the redemption price will be at par as long as the worst performing underlying asset is not below the risk barrier. Otherwise, the investor faces full down side risk with the redemption price of the note equal to the worst performing underlying asset. In the worst case scenario the investor will lose the entire investment.

The performance of each underlying asset is determined on each subsequent interest or autocall valuation date as the price on the relevant interest or autocall valuation date DIVIDED BY the price on the initial valuation date, expressed as a percentage.

The worst performing underlying is the underlying with the lowest performance among the underlying assets.

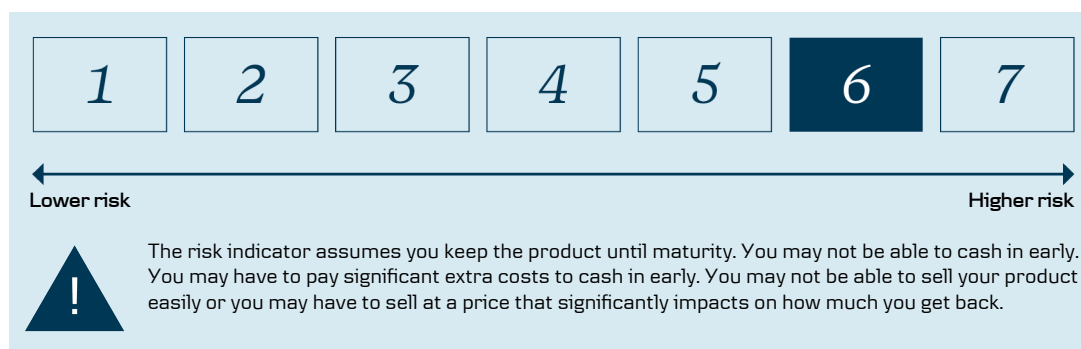

Autocall barrier:	90.0%
Interest barrier:	80.0%
Risk barrier:	60.0%
Coupon:	1.20%
Initial valuation date:	18 December 2020
Final valuation date:	18 December 2025
Interest and autocall valuation dates:	From 18 January 2021 and monthly to 18 December 2025

Issue date:	13 January 2021
Maturity:	13 January 2026
Currency:	SEK
The underlying assets are:	Hennes & Mauritz AB B, SSAB AB A, BillerudKorsnäs AB, ABB Ltd. (SE)

### Intended retail investor

This product is intended for retail investors who wishes to benefit from the potential coupon stream and any diversification effects from the product, and understand the downside risk in case of the worst performing underlying asset falling below the risk barrier at maturity (and the note has not redeemed early), and understand that their capital is fully at risk. Recommended holding period is until maturity and investor should not buy this product if he/she assumes that he/she will need cash earlier.

## What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 6 out of 7, which is the second-highest risk class. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios		1 year	3 years	13 January 2026
Stressed scenario	What you might get back after costs	SEK 5,486.27	SEK 5,666.05	SEK 1,624.22
	Average return each year	-94.51%	-31.39%	-19.68%
Unfavorable scenario	What you might get back after costs	SEK 39,161.96	SEK 29,988.75	SEK 20,114.75
	Average return each year	-60.84%	-23.29%	-15.98%
Moderate scenario	What you might get back after costs	SEK 70,017.27	SEK 65,744.78	SEK 55,337.57
	Average return each year	-29.98%	-11.40%	-8.93%
Favorable scenario	What you might get back after costs	SEK 102,732.86	SEK 124,064.08	SEK 132,400.00
	Average return each year	2.73%	8.01%	6.48%

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest SEK 100,000.00.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before maturity. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so.

Your maximum loss would be that you will lose all your investment.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## What happens if Danske Bank is unable to pay out?

The product is not protected by the Financial Services Compensation Scheme or any other investor compensation or guarantee scheme. This means that if Danske Bank is unable to pay out, you may lose all of your expected payments.

## What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself. They include potential early exit penalties. The figures assume you invest SEK 100,000.00. The figures are estimates and may change in the future.

### Cost over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in at 13 January 2026
Total costs	SEK 8,000.00	SEK 8,000.00	SEK 8,000.00
Impact on return (RIY) per year	8.00%	2.66%	1.60%

## Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

*This table shows the impact on return per year*

One-off costs	Entry costs	1.60%	The impact of the costs you pay when entering your investment.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs	None		
Incidental costs	None		

## How long should I hold it and can I take money out early?

Recommended holding period: 13 January 2026

This product is intended to be held until the end of the recommended holding period.

The recommended holding period has been selected to coincide with the ordinary maturity date of the product. Please note that it cannot be guaranteed that you will be able to sell the product before its maturity date. If you sell the product before its ordinary maturity date there is a risk that you will incur costs and that you may lose parts of or your entire investment.

## How can I complain?

Complaints about the product, the conduct of Danske Bank and/or the person advising on, or selling the product, should be addressed to Danske Bank, Juridisk Afdeling, Holmens Kanal 2-12, 1092 København K ([klageservice@danskebank.dk](mailto:klageservice@danskebank.dk)).

## Other relevant information

The risks set out in this document highlight some, but not all, of the risks of investing in this product. Prior to making any investment decision, you should satisfy yourself that you fully understand the risks relating to this product and seek professional advice as necessary.
