

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products. This document sets out the generic risks of the PRIIP that you may be considering as a financial investment, in order that you can compare to other products. The specific terms of the product that you enter into will set out in the confirmation in relation to that product.

Member state	This PRIIP is authorised in Denmark.
Date of production:	The date of this Key Information Document is 10 March 2023

Alert: You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

OTC - Average Rate Forward Seller

Term

The length of an Average Rate Forward will depend on how long you wish to have the right to settle the variable amount. The term will be agreed on before you enter into an Average Rate Forward. An Average Rate Forward is a bilateral agreement that cannot be ordinarily terminated unilaterally by either you or Danske Bank.

Objectives

Average Rate Forwards are binding agreements to settle a variable amount in a specific currency at the settlement date.

The aim of this product is to agree to settle a variable amount in a specific currency in cash based on a calculated average of predefined market spot rate observations. At the expiration date, you will have an obligation to settle the variable amount at the settlement date. The settlement amount is calculated as the difference between an agreed average forward rate and the calculated average of the market spot rate observations multiplied by a notional amount.

Depending on the calculated average, the settlement amount may be negative or positive.

Average Rate Forwards are binding agreements to settle an amount in a specific currency at the settlement date. The amount depends on the average of the market spot rate observations for a set of specified observation times (fixing frequency) in a specific currency notional (notional amount) and at an agreed settlement rate (average forward rate)

At the time of expiration, the following scenario applies:

The Average Rate Forward settles against the calculated average of the market spot rate and results in a settlement amount in the settlement currency to be exchanged between the buyer and the seller of the Average Rate Forward. The settlement amount may be positive or negative for the investor.

The terms set out below are illustrative of the terms of an Average Rate Forward, but are not the exact terms you agree with Danske Bank. The exact terms will be set out in each individual trade confirmation.

The illustrative terms are used for subsequent performance scenarios and calculation of costs.

The product terms provide that if certain exceptional events occur [1] Danske Bank may adjust the product and/or [2] Danske Bank or you may terminate the product early. These exceptional events in question are specified in the product terms and relate principally to the underlying, the product and conditions pertaining to you or Danske Bank. The return (if any) you receive on such early termination is likely to be different from that received in the scenarios described above.

Expiration time:	6 months
Average forward rate:	1.0544
Fixing frequency:	Weekly

Currency pair:	EUR/USD
Notional currency:	EUR
Notional amount:	10,000.00
Settlement currency:	USD

Intended retail investor

This product is intended for retail investors who

- (I) wish to hold an Average Rate Forward for the agreed-upon term and do not want to sell it back prematurely and
- (II) are in the position to bear losses that potentially may be unlimited.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. **Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

This product cannot be cashed in. This means it is difficult to estimate how much you would get back if you cash in before. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so.

The favorable, moderate and unfavorable scenarios have been calculated using a model to generate possible future outcomes based on the underlying assets' past performance and represent the 90th, 50th and 10th best outcomes, respectively. The stress scenario represents an outcome based on stressed market conditions.

Recommended Holding Period:		6 months
Example Investment:		EUR 10,000.00
		If you exit after Recommended Holding Period
Scenarios		
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stressed	What you might get back after costs	EUR -1,373.74
	Average return each year	-13.74%
Unfavorable	What you might get back after costs	EUR -487.42
	Average return each year	-4.87%
Moderate	What you might get back after costs	EUR -94.63
	Average return each year	-0.95%
Favorable	What you might get back after costs	EUR 279.15
	Average return each year	2.79%

What happens if Danske Bank is unable to pay out?

The product is not protected by the Financial Services Compensation Scheme or any other investor compensation or guarantee scheme. This means that if Danske Bank is unable to pay out, you may lose all of your expected payments.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- You would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000.00 is invested.

	<i>If you exit after recommended holding period</i>
Total costs	EUR 100.00
Cost impact (*) (**)	1.00%

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be % before costs and % after costs.

(**) This illustrates costs in relation to the notional value of the PRIIP.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry cost	1.00% of the amount you pay when entering this investment.	EUR 100.00
Exit cost	0.00% of your investment before it is paid out to you.	EUR 0.00
Ongoing costs		
Management fees and other administrative or operating costs	There is no such costs for this product.	EUR 0,00
Transactions costs	There is no transaction costs for this product.	EUR 0,00
Incidental cost taken under specific conditions		
Performance fees	There is no performance fee for this product.	EUR 0,00

How long should I hold it and can I take money out early?

This product is designed to be held until its maturity date and it is not a product which can be easily sold or transferred. Early termination may occur in the event of a default or disruption situation or if you or Danske Bank agree for it to be terminated early, in which case, early exit penalties may apply.

How can I complain?

Complaints about the product, the conduct of Danske Bank and/or the person advising on, or selling the product, should be addressed to Danske Bank, Juridisk Afdeling, Holmens Kanal 2-12, 1092 København K (klageservice@danskebank.dk).

Other relevant information

The risks set out in this document highlight some, but not all, of the risks of investing in this product. Prior to making any investment decision, you should satisfy yourself that you fully understand the risks relating to this product and seek professional advice as necessary.
