

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products. This document sets out the generic risks of the PRIIP that you may be considering as a financial investment, in order that you can compare to other products. The specific terms of the product that you enter into will set out in the confirmation in relation to that product.

Member state	This PRIIP is authorised in Denmark.
Date of production:	The date of this Key Information Document is 21 March 2023

**Alert:** You are about to purchase a product that is not simple and may be difficult to understand.

## What is this product?

### Type

OTC - Cross Currency Swap

### Term

The term of the Cross Currency Swap depends on the period for which you wish to exchange your interest payments and repayment of notional amounts with Danske Bank in the two currencies. The term is agreed on before you enter into the Cross Currency Swap. The Cross Currency Swap is a bilateral agreement that cannot be ordinarily terminated unilaterally neither by you nor by Danske Bank.

### Objectives

The objective of this product is to periodically exchange fixed or floating interest rate payments and potentially repayments of the notional amount in one currency for fixed or floating interest rate payments and potentially repayments of the notional amount in another currency from the start date until the end date.

The product achieves its objective by (1) Danske Bank agreeing the terms of the Cross Currency Swap with you; (2) you agreeing to pay or receive the fixed or floating rate and potentially repayments of the notional amount in the two currencies to/from Danske Bank. Payments are determined on the basis of the notional amount agreed on for each interest rate period and paid on pre-agreed dates. The notional amounts in the two currencies are initially exchanged at the start date and any remaining notional amounts in the two currencies are exchanged again on the end date.

Note that if an interest rate is negative, the party receiving/paying the corresponding interest rate amount instead pays/receives that amount. In other words, the cash flow is reversed.

You can typically  
exchange floating rates in one currency for floating rates in another currency  
exchange fixed rates in one currency for floating rates in another currency  
exchange fixed rates in one currency for fixed rates in another currency

The terms set out below are illustrative of the terms of a Cross Currency Swap, but are not the exact terms you agree with Danske Bank. The exact terms are set out in each individual trade confirmation letter.

The illustrative terms are used for subsequent performance scenarios and calculation of costs.

The product terms provide that if certain exceptional events occur (1) Danske Bank may adjust the product; and/or (2) Danske Bank or you may terminate the product early. The exceptional events in question are specified in the product terms and relate principally to the underlying, the product and conditions pertaining to you or Danske Bank. The return (if any) you receive on such early termination is likely to be different from that received in the scenarios described above.

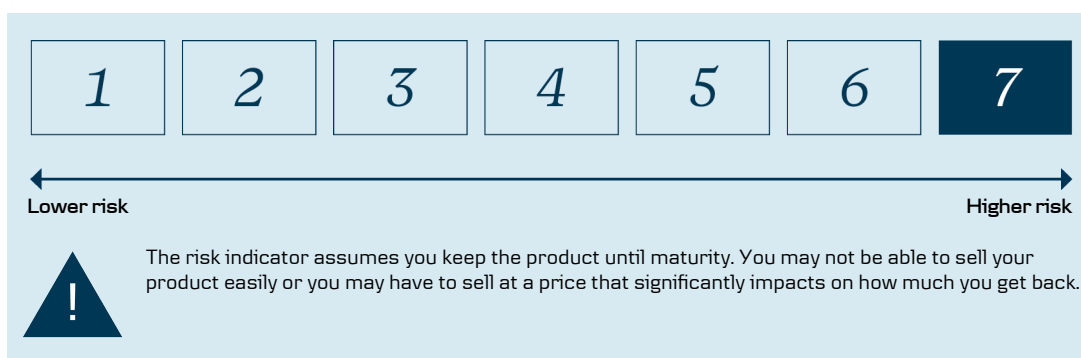

Start Date:	Today
End Date:	Today + 10 years
You pay:	SOFR 3 months flat
You receive:	Euribor 6 months flat

Currency 1:	USD
Currency 2:	EUR
Notional:	EUR 10,000.00
Schedule:	Bullet

### Intended retail investor

This product is intended for retail investors who wish to hedge an underlying interest rate risk and FX exposure.

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. **Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

### Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The favorable, moderate and unfavorable scenarios have been calculated using a model to generate possible future outcomes based on the underlying assets' past performance and represent the 90th, 50th and 10th best outcomes, respectively. The stress scenario represents an outcome based on stressed market conditions.

Recommended Holding Period:		10 years		
Example Investment:		EUR 10,000.00		
		If you exit after 1 year	If you exit after 5 years	If you exit after 10 years
<b>Scenarios</b>				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress	What you might get back after costs	EUR -2,755.75	EUR -5,757.84	EUR -6,674.89
	Average return each year	-27.56%	-11.52%	-6.68%
Unfavorable	What you might get back after costs	EUR -1,052.56	EUR -2,784.94	EUR -3,304.97
	Average return each year	-10.53%	-5.57%	-3.31%
Moderate	What you might get back after costs	EUR -47.33	EUR -118.14	EUR -70.05
	Average return each year	-0.48%	-0.24%	-0.07%
Favorable	What you might get back after costs	EUR 1,049.23	EUR 3,069.92	EUR 4,157.10
	Average return each year	10.49%	6.14%	4.16%

## What happens if Danske Bank is unable to pay out?

The product is not protected by the Financial Services Compensation Scheme or any other investor compensation or guarantee scheme. This means that if Danske Bank is unable to pay out, you may lose all of your expected payments.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

**Cost over time**

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000.00 is invested

	<i>If you exit after 1 year</i>	<i>If you exit after 5 years</i>	<i>If you exit after recommended holding period</i>
<b>Total costs</b>	EUR 1.71	EUR 1.71	EUR 1.71
<b>Annual cost impact</b> [*] [**]	0.02%	0.00%	0.00%

[\*] This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 4.16% before costs and 4.16% after costs.

[\*\*] This illustrates costs in relation to the notional value of the PRIIP.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

**Composition of costs**

<b>One-off costs upon entry or exit</b>		<b>If you exit after 1 year</b>
Entry cost	0.00% of the amount you pay when entering this investment.	EUR 1.71
Exit cost	0.00% of your investment before it is paid out to you.	EUR 0.00
<b>Ongoing costs</b>		
Management fees and other administrative or operating costs	There is no such costs for this product.	EUR 0,00
Transactions costs	There is no transaction costs for this product.	EUR 0,00
<b>Incidental cost taken under specific conditions</b>		
Performance fees	There is no performance fee for this product.	EUR 0,00

The cost for this product is based upon the actual sensitivity to interest rates and their volatility. Actual costs will depend upon credit, funding and capital charges.

These costs are client specific and cannot be specified before the product is priced towards the client.

**How long should I hold it and can I take money out early?**

This product is designed to be held until its maturity date and it is not a product which can be easily sold or transferred. Early termination may occur in the event of a default or disruption situation or if you or Danske Bank agree for it to be terminated early, in which case, early exit penalties may apply.

**How can I complain?**

Complaints about the product, the conduct of Danske Bank and/or the person advising on, or selling the product, should be addressed to Danske Bank, Juridisk Afdeling, Holmens Kanal 2-12, 1092 København K ([klageservice@danskebank.dk](mailto:klageservice@danskebank.dk)).

**Other relevant information**

The risks set out in this document highlight some, but not all, of the risks of investing in this product. Prior to making any investment decision, you should satisfy yourself that you fully understand the risks relating to this product and seek professional advice as necessary.
