Member state	This PRIIP is authorised in Denmark.
Date of production:	The date of this Key Information Document is 27 March 2023

Alert: You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

OTC - Collar

Term

The term of the Interest Rate Cap depends on the period for which you wish to hedge your interest payments with Danske Bank or accept to be exposed to rising rates if you sell the product. The term is agreed on before you enter into the Interest Rate Cap. The Interest Rate Cap is a bilateral agreement that cannot be ordinarily terminated unilaterally neither by you nor by Danske Bank.

Objectives

The objective of this product is to either

have the right (if you buy the product and pay a net premium) to receive the difference between the floating rate and the "high" strike rate if the floating rate on a given fixing date is higher than the "high" strike rate, **or** be bound to pay the difference between the "low" strike rate and the floating rate if the floating rate on a fixing date is lower than the "low" strike rate.

or

be bound (if you sell the product and receive a net premium) to pay the difference between the floating rate and the "high" strike rate if the floating rate on a given fixing date is higher than the "high" strike rate, **or** have the right to receive the difference between the "low" strike rate and the floating rate if the floating rate on a given fixing date is lower than the "low" strike rate.

The product achieves its objective by (1) Danske Bank agreeing the terms of the Collar with you; (2) you agreeing to pay or receive a fixed premium to/from Danske Bank. The high and low strike rate can be fixed as agreed between the parties to the effect that the net premium is zero.

The following typically applies:

If the floating interest rate is higher than the "high" strike rate, the party buying the Collar receives the difference between the floating rate and the "high" strike rate.

If the floating interest rate is lower than the "low" strike rate, the party buying the Collar pays the difference between the "low" strike rate and the floating rate to the seller.

If the floating interest rate equals the "low" strike rate or the "high" strike rate or is between the two, neither the seller nor the buyer makes any payment.

Terms set out below are illustrative of the terms of an interest rate Collar, but are not the exact terms you agree with Danske Bank. The exact terms are set out in each individual trade confirmation letter.

The illustrative terms are used for subsequent performance scenarios and calculation of costs.

The product terms provide that if certain exceptional events occur (1) Danske Bank may adjust the product; and/or (2) Danske Bank or you may terminate the product early. The exceptional events in question are specified in the product terms and relate principally to the underlying, the product and conditions pertaining to you or Danske Bank. The return (if any) you receive on such early termination is likely to be different from that received in the scenarios described above.

Currency:	EUR
Notional:	10,000.00
Schedule:	Bullet
Index:	Euribor 6 months

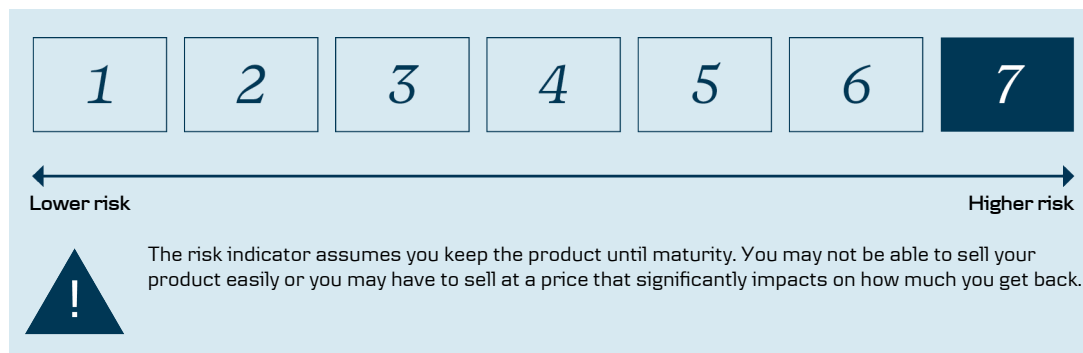

Start Date:	Today
End Date:	Today + 5 years
Buyer receives/ Buyer pays:	Receives Max [Index - high strike ; 0] or Pays Max [Low strike - index ; 0]
Premium:	EUR 9.33

Strike: At-the-money (ATM) +/-50bp

Premium running: 1.9bp

Intended retail investor

This product is intended for retail investors who for a bought Cap wish to hedge the underlying interest rate risk or for a sold Cap accepts to pay any positive difference between the floating rate and the cap strike in return for receiving a premium.

What are the risks and what could I get in return?**Risk Indicator**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The favorable, moderate and unfavorable scenarios have been calculated using a model to generate possible future outcomes based on the underlying assets' past performance and represent the 90th, 50th and 10th best outcomes, respectively. The stress scenario represents an outcome based on stressed market conditions.

Recommended Holding Period:		5 years	
Example Investment:		EUR 10,000.00	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stressed	What you might get back after costs	EUR -1,347.22	EUR -1,315.36
	Average return each year	-13.41%	-2.62%
Unfavorable	What you might get back after costs	EUR -252.60	EUR -368.73
	Average return each year	-2.46%	-0.73%
Moderate	What you might get back after costs	EUR -38.58	EUR -20.49
	Average return each year	-0.32%	-0.03%
Favorable	What you might get back after costs	EUR 180.57	EUR 271.22
	Average return each year	1.87%	0.55%

What happens if Danske Bank is unable to pay out?

The product is not protected by the Financial Services Compensation Scheme or any other investor compensation or guarantee scheme. This means that if Danske Bank is unable to pay out, you may lose all of your expected payments.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- You would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000.00 is invested.

	<i>If you exit after 1 year</i>	<i>If you exit after recommended holding period</i>
Total costs	EUR 15.49	EUR 15.49
Annual cost impact [*] [**]	0.15%	0.03%

[*] This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 0.59% before costs and 0.55% after costs.

[**] This illustrates costs in relation to the notional value of the PRIIP.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry cost	0.15% of the amount you pay when entering this investment.	EUR 15.49
Exit cost	0.00% of your investment before it is paid out to you.	EUR 0.00
Ongoing costs		
Management fees and other administrative or operating costs	There is no such costs for this product.	EUR 0,00
Transactions costs	There is no transaction costs for this product.	EUR 0,00
Incidental cost taken under specific conditions		
Performance fees	There is no performance fee for this product.	EUR 0,00

The cost for this product is based upon the actual sensitivity to interest rates and their volatility. Actual costs will depend upon credit, funding and capital charges.

These costs are client specific and cannot be specified before the product is priced towards the client.

How long should I hold it and can I take money out early?

This product is designed to be held until its maturity date and it is not a product which can be easily sold or transferred. Early termination may occur in the event of a default or disruption situation or if you or Danske Bank agree for it to be terminated early, in which case, early exit penalties may apply.

How can I complain?

Complaints about the product, the conduct of Danske Bank and/or the person advising on, or selling the product, should be addressed to Danske Bank, Juridisk Afdeling, Holmens Kanal 2-12, 1092 København K (klageservice@danskebank.dk).

Other relevant information

The risks set out in this document highlight some, but not all, of the risks of investing in this product. Prior to making any investment decision, you should satisfy yourself that you fully understand the risks relating to this product and seek professional advice as necessary.
