

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products. This document sets out the generic risks of the PRIIP that you may be considering as a financial investment, in order that you can compare to other products. The specific terms of the product that you enter into will set out in the confirmation in relation to that product.

Date of production:	The date of this Key Information Document is 1 January 2018

Alert: You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

OTC - Cross Currency Swap

Objectives

The objective of this product is to periodically exchange fixed or floating interest rate payments and potentially repayments of the notional amount in one currency for fixed or floating interest rate payments and potentially repayments of the notional amount in another currency from the start date until the end date.

The product achieves its objective by (1) Danske Bank agreeing the terms of the Cross Currency Swap with you; (2) you agreeing to pay or receive the fixed or floating rate and potentially repayments of the notional amount in the two currencies to/from Danske Bank. Payments are determined on the basis of the notional amount agreed on for each interest rate period and paid on pre-agreed dates. The notional amounts in the two currencies are initially exchanged at the start date and any remaining notional amounts in the two currencies are exchanged again on the end date.

Note that if an interest rate is negative, the party receiving/paying the corresponding interest rate amount instead pays/receives that amount. In other words, the cash flow is reversed.

You can typically

- exchange floating rates in one currency for floating rates in another currency
- exchange fixed rates in one currency for floating rates in another currency
- exchange fixed rates in one currency for fixed rates in another currency

The terms set out below are illustrative of the terms of a Cross Currency Swap, but are not the exact terms you agree with Danske Bank. The exact terms are set out in each individual trade confirmation letter.

The illustrative terms are used for subsequent performance scenarios and calculation of costs.

The product terms provide that if certain exceptional events occur (1) Danske Bank may adjust the product; and/or (2) Danske Bank or you may terminate the product early. The exceptional events in question are specified in the product terms and relate principally to the underlying, the product and conditions pertaining to you or Danske Bank. The return (if any) you receive on such early termination is likely to be different from that received in the scenarios described above.

Start Date:	Today
End Date:	Today + 10 years
You pay:	LIBOR 3 months flat
You receive:	Euribor 6 months flat

Currency 1:	USD
Currency 2:	EUR
Notional:	EUR 10,000.00
Schedule:	Bullet

Intended retail investor

This product is intended for retail investors who wish to hedge an underlying interest rate risk and FX exposure.

Term

The term of the Cross Currency Swap depends on the period for which you wish to exchange your interest payments and repayment of notional amounts with Danske Bank in the two currencies. The term is agreed on before you enter into the Cross Currency Swap. The Cross Currency Swap is a bilateral agreement that cannot be ordinarily terminated unilaterally neither by you nor by Danske Bank.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. **Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios		1 year	5 years	10 years
Stressed scenario	What you might get back after costs	EUR -1,675.40	EUR -3,015.26	EUR -4,130.16
	Average return each year	-16.75%	-6.03%	-4.13%
Unfavorable scenario	What you might get back after costs	EUR -894.72	EUR -2,298.39	EUR -3,279.61
	Average return each year	-8.95%	-4.60%	-3.28%
Moderate scenario	What you might get back after costs	EUR 35.27	EUR -221.19	EUR -304.48
	Average return each year	0.35%	-0.44%	-0.30%
Favorable scenario	What you might get back after costs	EUR 1,140.08	EUR 2,741.39	EUR 3,557.96
	Average return each year	11.40%	5.48%	3.56%

This table shows the money you could get back over the next 10 years, under different scenarios, assuming that you invest EUR 10,000.00. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Danske Bank is unable to pay out?

The product is not protected by the Financial Services Compensation Scheme or any other investor compensation or guarantee scheme. This means that if Danske Bank is unable to pay out, you may lose all of your expected payments.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself. They include potential early exit penalties. The figures assume you invest EUR 10,000.00. The figures are estimates and may change in the future.

Cost over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Scenarios	End of recommended holding period
Total costs	EUR 1.69
Impact on return (RIY) per year	0.00%

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	0.00%	The impact of the costs you pay when entering your investment.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs	None		
Incidental costs	None		

The cost for this product is based upon the actual sensitivity to interest rates and their volatility. Actual costs will depend upon credit, funding and capital charges.

These costs are client specific and cannot be specified before the product is priced towards the client.

How long should I hold it and can I take money out early?

This product is designed to be held until its maturity date and is it not a product which can be easily sold or transferred. Early termination may occur in the event of a default or disruption situation or if you or Danske Bank agree for it to be terminated early, in which case, early exit penalties may apply.

How can I complain?

Complaints about the product, the conduct of Danske Bank and/or the person advising on, or selling the product, should be addressed to Danske Bank, Juridisk Afdeling, Holmens Kanal 2-12, 1092 København K (klageservice@danskebank.dk).

Other relevant information

The risks set out in this document highlight some, but not all, of the risks of investing in this product. Prior to making any investment decision, you should satisfy yourself that you fully understand the risks relating to this product and seek professional advice as necessary.
